

Receiving and transmitting data on a connected device

CASTEL Alexandre
DELORY Siméon
EUDELIN Cyprien
GIRARD Nicolas

Receiving and transmitting data on a touch screen

Description of the project :

- Internal communication of sensors
 - Data management
 - Data processing
 - Data exchange

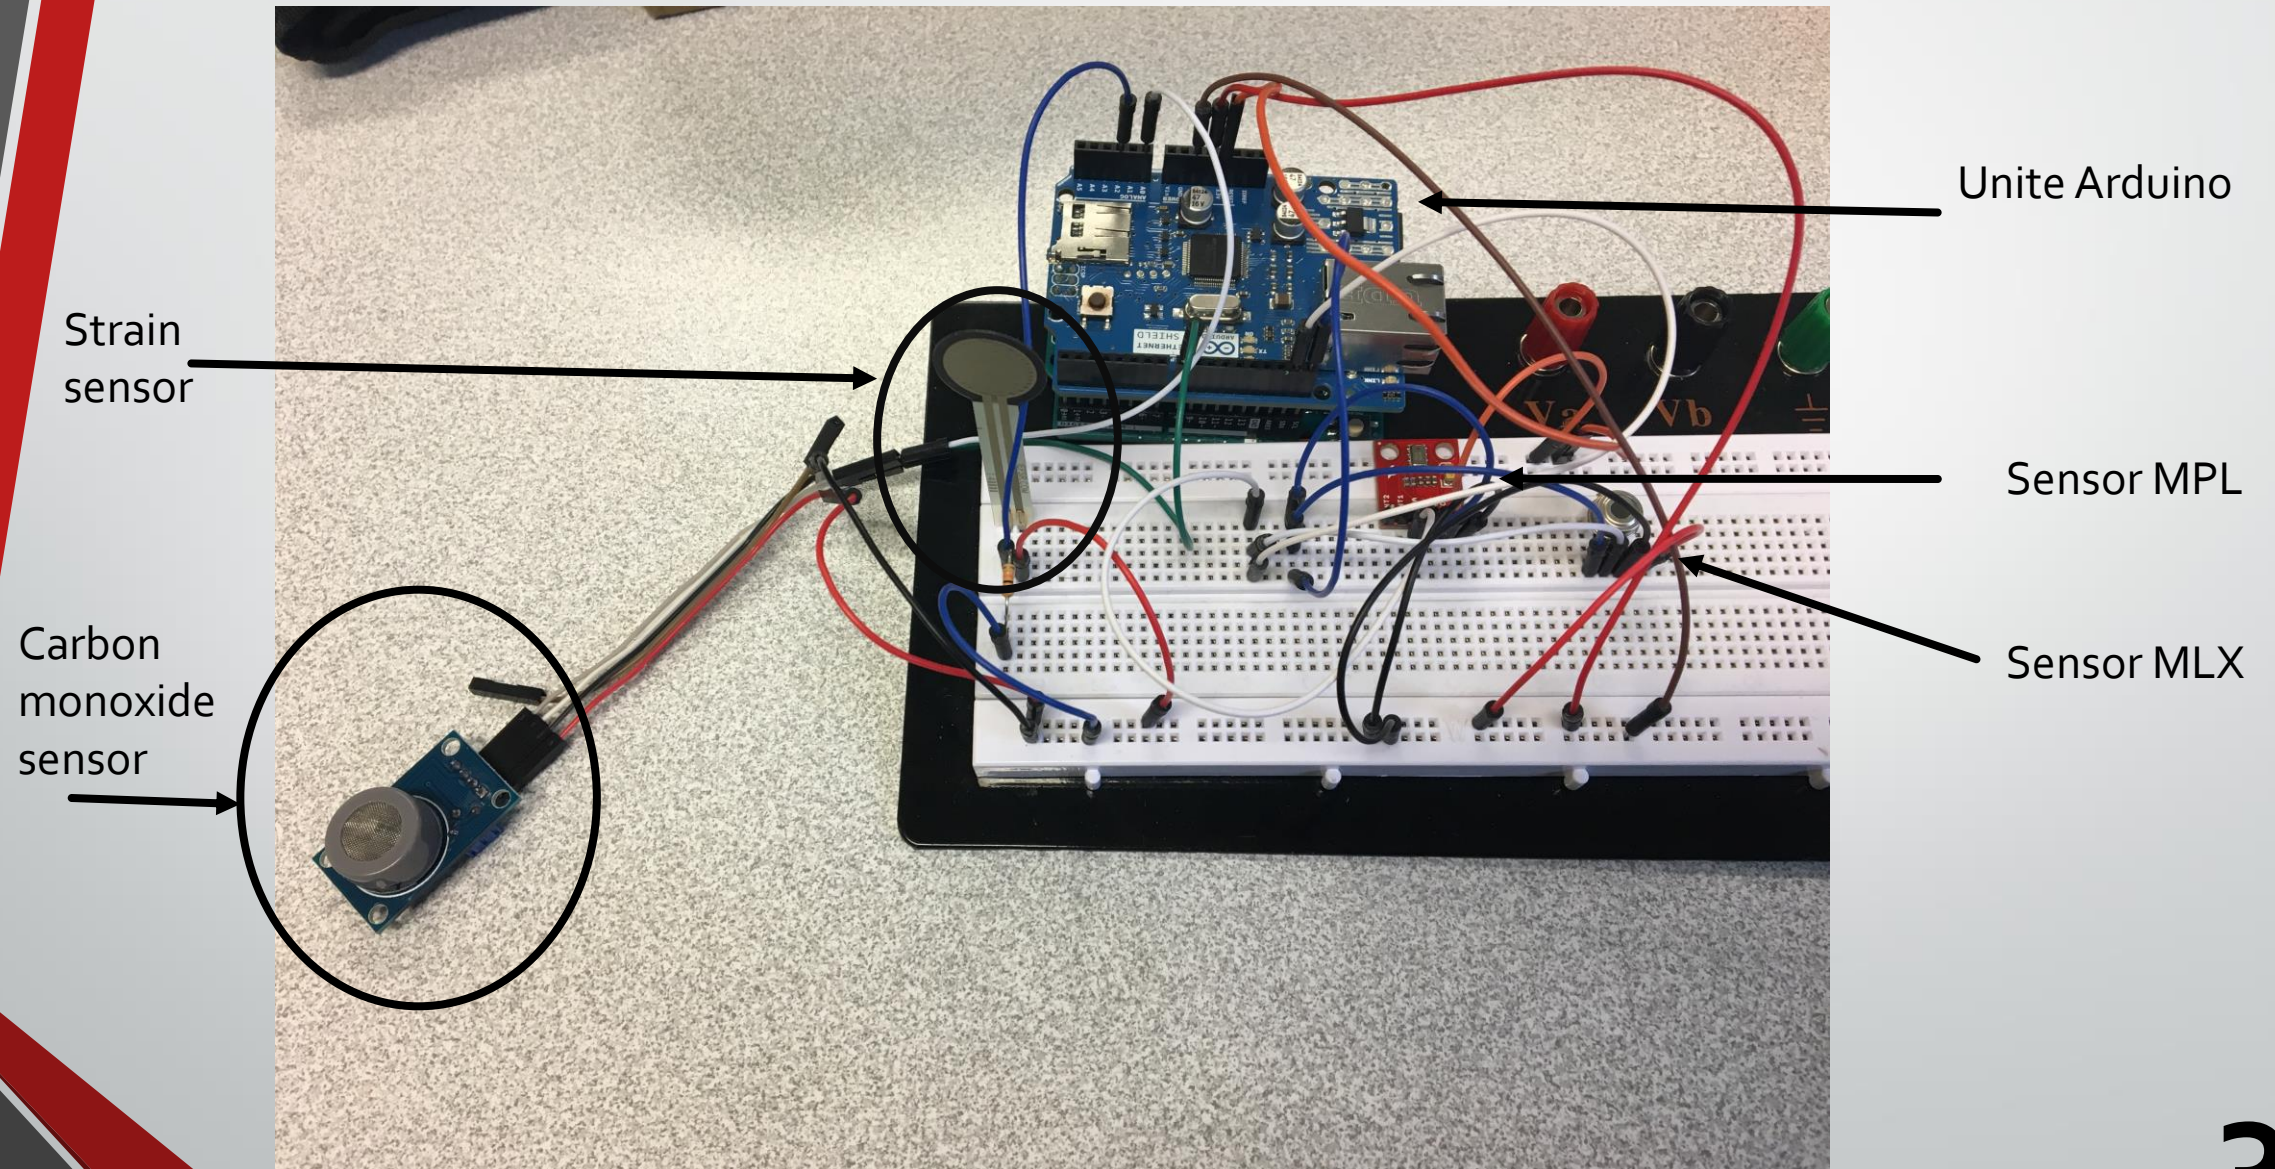

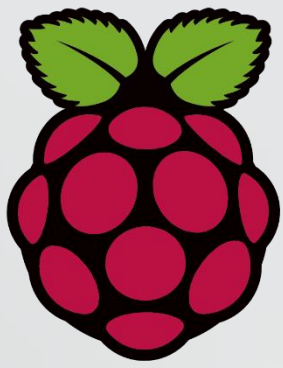

The strengths of the project :

- Adaptability of the system to interact with other systems
- Easy to use

Unit Arduino

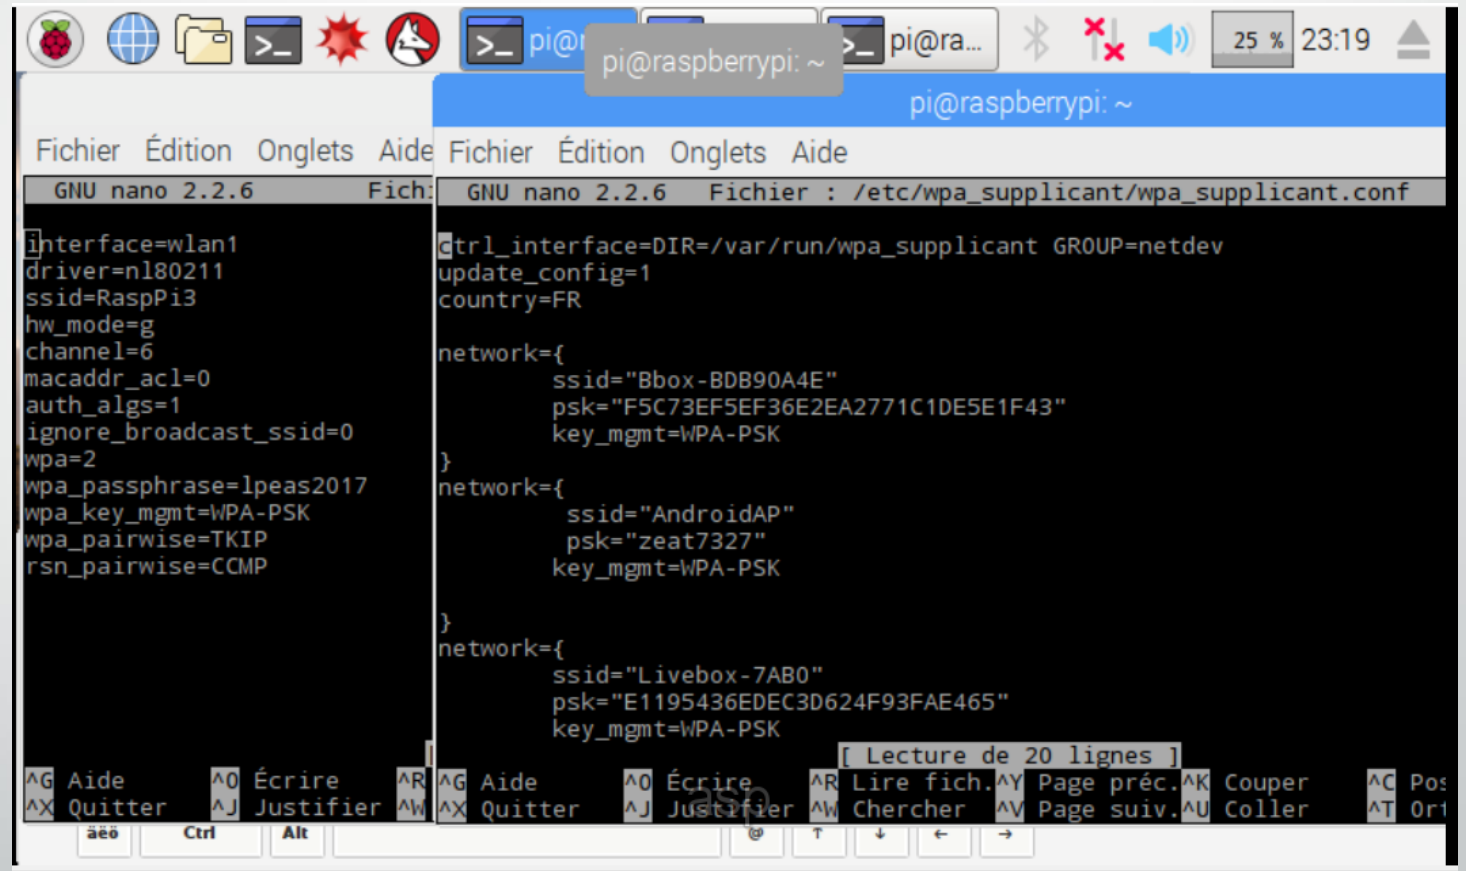

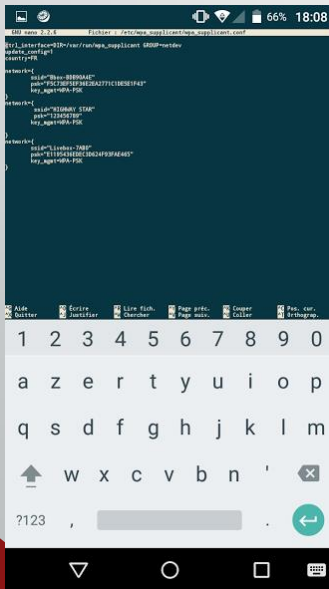

Raspberry

Key words :

- Analysis of Raspberry
- Initial configuration
- Programming

Thank you for your attention
